Parent Guide to Edu-Ventures Tours

Why should my child travel?
Traveling the world has a tremendously positive impact on students. The world is becoming smaller and we need to be able to relate to people from other countries. Here are some of the benefits of travelling abroad:

~ Introduces students to new cultures through first hand experiences
  o Cultural differences are more than just variations in language, appearances and food. It displays profound beliefs, perceptions and values that influence one’s way of life and the way that they view the world. Experiencing cultural differences personally can develop a true understanding of where other cultures are coming from.

~ It will help students develop skills and provide experiences a classroom setting will never provide.
  o Being immersed in an entirely new cultural situation is an opportunity to discover new capabilities and skills, overcome new challenges and solve new problems. Students will encounter situations that are entirely unfamiliar to them and will learn to adapt and respond in successful ways.

~ Study abroad enhances college and employment opportunities.
  o The world continues to become more globalized. A college or employer sees a student who has travelled abroad as a self-motivated, independent person who is willing to embrace challenges and able to cope with diverse problems and situations. Experience in a foreign country will set them apart from the majority of other job applicants.

~ Optimal way to learn a language
  o Becoming immersed in a foreign country is the best way to learn and master a new language.

Why travel with Edu-Ventures?

~ Priority one is safety
  o All of our guides have been trained in First Aid/CPR
  o Every location and activity has been personally scouted by the owner, we don’t rely on second hand information
